

STATEMENT OF PURPOSE

INTRODUCTION

My name is _____ born on _____ in _____. My family values education, hard work, and persistence. My parents' commitment to their work and personal lives has motivated me to take a similar path. Their steady support has pushed me to seek higher education and build the skills needed to make a real difference in society. I am passionate about problem-solving and technology. I have always found the challenges in Cyber Security intriguing. I want to gain the technical skills and hands-on knowledge necessary to succeed in this field and create a positive impact in the world.

ACADEMIC BACKGROUND

I completed my schooling at _____ in _____ where I earned a GPA of _____ and then completed my higher secondary education at _____ graduating with a GPA of 3.19. My interest in technology and logical thinking led me to earn a Bachelor's degree in Cyber Security. My academic journey has been driven by a desire to understand and tackle issues related to digital systems, networks, and data security. Although I do not have any professional work experience yet, my education has provided me with a solid foundation in the basics of Cyber Security and related technical fields.

WHY I CHOSE THE UK

The United Kingdom is my preferred choice for higher studies because of its long diplomatic ties with Nepal and its strong reputation for academic quality. UK universities are well-known for their high standards and degrees that are recognized around the world, giving an edge in the international job market. The educational institutions in the UK offer challenging academic programs that are respected globally.

In addition to its renowned academic environment, the UK offers access to exceptional healthcare services, which ensure that students receive necessary medical attention during their studies, contributing to a healthy and productive academic life.

Another important factor is the duration of undergraduate programs in the UK. While many countries need four years for a bachelor's degree, most UK programs can be finished in three

years. This shorter time lets students join the workforce earlier without losing quality of education.

Furthermore, studying in an English-speaking country also offers a great chance to improve English skills. These skills are crucial for academic success and future job opportunities.

In conclusion, the UK presents an excellent combination of globally recognized degrees, exceptional healthcare, shorter program durations, and an immersive English-language environment, making it a top choice for international students.

WHY COVENTRY UNIVERSITY

Coventry University is one of the leading educational institutions in the UK. It is known for its high academic standards and widely recognized qualifications. The university is ranked among the top 42 universities in the UK by The Guardian University Guide 2025. It has shown a steady commitment to academic success and student achievement. Furthermore, Coventry University is listed in the top 250 young universities worldwide by the Times Higher Education Young University Rankings.

One of Coventry University's key strengths is its emphasis on employability. The university has strong links with industry, and its career services ensure that students are well-equipped to meet the demands of the professional world. Coventry offers state-of-the-art facilities, including modern laboratories, advanced computing resources, and collaborative learning spaces that foster innovation and creativity.

The faculty at Coventry is highly respected, and the university offers many student support services. Its modern housing options and well-kept classrooms create a great learning environment. The university's diverse and welcoming atmosphere lets students connect with peers from around the world, improving cultural understanding and teamwork.

In conclusion, Coventry University offers comprehensive educational experience with its strong academic reputation, excellent student services, and emphasis on employability, making it the ideal choice for pursuing higher education.

WHY BSC (HONS) IN CYBER SECURITY

The BSc (Hons) in Cyber Security at Coventry University offers a solid understanding of the changing field of cyber threats and data protection. In today's digital world, cyber-attacks are getting more complex, and the demand for skilled professionals to combat them has never been higher. The program at Coventry University includes important topics like network security, ethical hacking, digital forensics, cryptography, and security management. I am especially looking forward to combining theoretical knowledge with practical experience through projects, case studies, and internships. This approach will help me learn the concepts and apply them in real situations, providing valuable insights into the challenges and solutions in the world of Cyber Security.

As cyber threats continue to escalate globally, I see this program as a crucial stepping stone toward understanding the complexities of protecting sensitive data, securing networks, and mitigating cyber risks. In my home country, Nepal, data breaches have become an alarming issue, with businesses and individuals falling victim to cyber attacks more frequently. This increasing threat to national and personal data security has highlighted the urgent need for experts who can combat these risks. With a rapidly growing digital economy and increasing reliance on technology, Nepal is vulnerable to these security challenges. By gaining a deep understanding of cybersecurity principles, I plan to contribute to the mitigation of such risks and enhance data security in my country.

COURSE MODULES

The course offers a well-rounded curriculum designed to provide students with a deep and comprehensive understanding of the complexities involved in Cyber Security. The modules cover both foundational and advanced topics to ensure that students are equipped to tackle current and emerging cyber threats. The program is structured as follows:

Year 1

- Networking
- Operating System
- Information Security
- Problem Solving and Programming

Year 2

- Network Security and Cryptography
- Computer Forensic
- Algorithm and Data Structure
- Communication and Collaboration

Year 3

- Secure Programming
- Internet of Things (IOT)
- Contemporary Issues in Computing
- Project

FUTURE PLANS

Upon completing my degree, I plan to return to Nepal and start a career in Cyber Security. The knowledge and skills I gain from this program will help me work with organizations to protect their digital systems, secure sensitive information, and tackle increasing cyber threats. With the concerning rise in cyber-attacks on both public and private sectors in Nepal, I want to have a meaningful impact on improving the country's cyber defenses.

In the long term, my goal is to establish a Cyber Security consultancy firm that will provide tailored solutions to businesses and individuals, ensuring that they are better equipped to combat cyber threats. This will also contribute to filling the growing gap in Nepal's demand for qualified security professionals. My mission is to help businesses and individuals protect their assets and sensitive information from the ever-increasing risk of cyber attacks.

CONCLUSION

Studying Cyber Security at Coventry University will equip me with the academic foundation, technical expertise, and global perspective needed to thrive in this fast-paced and constantly evolving field. I am excited about the opportunity to learn from renowned experts, engage in collaborative research, and contribute meaningfully to the broader Cyber Security community. As the digital landscape continues to expand and cyber threats become more complex, I am eager to take on the challenges and growth that lie ahead during my academic journey and subsequent professional career. This program will not only help me secure my own future but also allow me to make a positive impact in the field of Cyber Security in Nepal.

Sincerely,
